

UPUTSTVO ZA UPOTREBU

(SRB)

Nutrient Agar Plate

Podloga za kultivaciju širokog spektra mikroorganizama.

Sadržaj pakovanja:

Šifra artikla (pakovanja) REF	Opis	Šifra primarnog pakovanja:	Broj podloga
PRM001V20	Podloga izlivena u petri posudama od Ø90	PRM001	20
PRM001V60			60
PRM001V240			240
PRM001M40			40

Upustva

Pod aseptičnim uslovima inokulisati ploču metodom površinskog zasejavanja i inkubirati je pod određenim uslovima.

Princip i interpretacija

Podloge pod nazivom "Hranljive/Nutrient" su osnovne podloge za održavanje organizama, za kultivaciju nutritivno zahtevnih organizama uz obogaćivanje osnovne podloge serumom ili krvlju, kao i za proveru čistoće kultura pre biohemiskog ili serološkog testiranja (1,2). Nutrient Agar je idealan za demonstracione i nastavne svrhe gde je potrebno prođeno gajenje kultura na temperaturi okoline bez rizika od prerastanja kultura, do kojeg može doći na nutritivno bogatijim supstratima. Ova relativno jednostavna podloga se u upotrebi zadražala do danas i još uvek se široko koristi u mikrobiološkim ispitivanjima različitih materijala, a takođe je preporučena i od standardnih metoda. Ona je jedna od neselektivnih podloga korisnih u rutinskoj kultivaciji mikroorganizama (3,4). Može se koristiti i za kultivaciju i enumeraciju bakterija koje nisu nutritivno zahtevne.

Peptinski hidrolizat životinjskog tkiva, govedi ekstrakt i ekstrakt kvasca obezbeđuju neophodna azotna i ugljenikova jedinjenja, vitamine i neke sastojke u tragovima koji su potrebni za rast bakterija. Natrijum hlorid održava osmotsku ravnotežu podloge.

Kontrola kvaliteta

Podaci i rezultati kontrole kvaliteta dati su u sertifikatu analize za svaku seriju.

Skladištenje i rok upotrebe

Čuvati između 15-25°C. Nakon prvog otvaranja čuvati na 2-8°C. Upotrebiti pre isteka datuma označenog na nalepnici.

Mere predostrožnosti

Ovaj proizvod ne sadrži hazardne supstance u koncentracijama koje su iznad propisanih limita određenih važećim zakonskim regulativama i zato nije klasifikovan kao opasan. Ipak, preporučeno je slediti smernice iz bezbednosnog lista za pravilnu upotrebu. Ovaj proizvod je namenjen isključivo za upotrebu u laboratorijskim uslovima, od strane profesionalno obučene osobe.

Proizvod ne upotrebljavati ukoliko je primarno pakovanje oštećeno ili proizvod ne odgovara navedenim karakteristikama.

Odlaganje otpada

Odlaganje otpada mora biti u skladu sa nacionalnim i lokalnim regulativama koje su na snazi. Svaka laboratorija je odgovorna za rukovanje i odlaganje otpada koji nastaje u toku rada.

Upotrebljeni simboli

CE	Evropski znak usaglašenosti	↑↑	Držati uspravno
IVD	In vitro dijagnostičko medicinsko sredstvo	REF	Kataloški broj
	Ne izlagati direktno sunčevim zracima	LOT	Lot broj
	Konsultovati uputstvo za upotrebu		Rok upotebe
	Ne koristiti više puta		Temperatura čuvanja
	Veličina pakovanja		Proizvođač
EC REP	Ovlašćeni predstavnik u Evropskoj uniji

INSTRUCTION FOR USE

(EN)

Nutrient Agar Plate

Medium is used for the cultivation of wide spectrum of microorganisms.

Package contents:

Item code (packaging) REF	Description	Primary packaging code:	Number of products
PRM001V20	Substrate poured into petri dishes of Ø90	PRM001	20
PRM001V60			60
PRM001V240			240
PRM001M40	Substrate poured into petri dishes of Ø50		40

Directions

Surface spread the test inoculum aseptically on the plate and incubate under optimal conditions.

Principle and interpretation

Nutrient media are basic culture media used for maintaining microorganisms, cultivating fastidious organisms by enriching with serum or blood and are also used for purity checking prior to biochemical or serological testing (1, 2). Nutrient Agar is ideal for demonstration and teaching purposes where a more prolonged survival of cultures at ambient temperature is often required without risk of overgrowth that can occur with more nutritious substrate. This relatively simple formula has been retained and is still widely used in the microbiological examination of variety of materials and is also recommended by standard methods. It is one of the several non-selective media useful in routine cultivation of microorganisms (3, 4). It can be used for the cultivation and enumeration of bacteria which are not particularly fastidious. Peptic digest of animal tissue, beef extract and yeast extract provide the necessary nitrogen compounds, carbon, vitamins and also some trace ingredients necessary for the growth of bacteria. Sodium chloride maintains the osmotic equilibrium of the medium.

Quality control

The data and results of quality control are given in the certificate of analysis for each lot.

Storage and shelf life

Storage between 15-25°C. After opening storage between 2-8°C.
Use before expiry date on the label.

Warning and precautions

In vitro diagnostic use only. Read the label before opening the container. Wear protective gloves/protective clothing/eye protection/ face protection. Follow good microbiological lab practices while handling specimens and culture. Standard precautions as per established guidelines should be followed while handling clinical specimens. Safety guidelines may be referred in individual safety data sheets.

Disposal

User must ensure safe disposal by autoclaving and/or incineration of used or unusable preparations of this product. Follow established laboratory procedures in disposing of infectious materials and material that comes into contact with clinical sample must be decontaminated and disposed of in accordance with current laboratory techniques.

Symbols used on labels

	European Conformity mark		This side up
	is an in vitro diagnostic medical device (IVD)		Catalogue number
	Do not expose directly to sunlight		Batch code
	Consult instructions for use		Use-by date
	Do not re-use		Temperature limit
	Pack size		Manufacturer
	European Authorized Representative (Authorised Representative)
