

## UPUTSTVO ZA UPOTREBU

(SRB)

### Sheep Blood Agar Plate

Podloga za izolaciju i kultivaciju visoko zahtevnih patogenih mikroorganizama kao što su Neisseria, streptokoke itd.

### Sadržaj pakovanja:

Šifra artikla (pakovanja) REF	Opis	Šifra primarnog pakovanja:	Broj podloga
PRM073V20	Podloga izlivena u petri posudama od ø90	PRM073	20
PRM073V60			60
PRM073V240			240
PRM073M40			40

### Uputstva

Pod aseptičnim uslovima inkubirati ploču metodom površinskog zasejavanja. Nakon inkubacije posmatrati rast i hemolizu oko kolonija.

### Princip i interpretacija

Sheep Blood Agar je visoko hranljiva podloga namenjena izolaciji i kultivaciji zahtevnih mikroorganizama. Blood Agar je preporučena od strane APHA (5) i standardnih metoda (6,7) za ispitivanje uzorka hrane. Govedi ekstrakt i triptozna obezbeđuju ugljenik, azot, aminokiseline i vitamine. Natrijum hlorid pomaže u održavanju osmotske ravnoteže podloge. Prisustvo krvi čini podlogu hranljivom pružajući dodatne faktore rasta koji su potrebni zahtevnim mikroorganizmima. Krv takođe pomaže i u vizualizaciji hemolitičkih reakcija. Međutim, hemolitičke reakcije zavise od upotrebljene životinjske krvi. Ovčja krv daje najbolje rezultate za Streptokoke grupe A (8), ali ovčja krv ne podržava rast Haemophilus haemolyticus, jer ima deficit piridin nukleotida.

### Kontrola kvaliteta

Podaci i rezultati kontrole kvaliteta dati su u sertifikatu analize za svaku seriju.

### Skladištenje i rok upotrebe

Čuvati između 15-25°C. Nakon prvog otvaranja čuvati na 2-8°C. Upotrebiti pre isteka datuma označenog na nalepnici.

### Mere predostrožnosti

Ovaj proizvod ne sadrži hazardne supstance u koncentracijama koje su iznad propisanih limita određenih važećim zakonskim regulativama i zato nije klasifikovan kao opasan. Ipak, preporučeno je slediti smernice iz bezbednosnog lista za pravilnu upotrebu. Ovaj proizvod je namenjen isključivo za upotrebu u laboratorijskim uslovima, od strane profesionalno obučene osobe.

Proizvod ne upotrebljavati ukoliko je primarno pakovanje oštećeno ili proizvod ne odgovara navedenim karakteristikama.

### Odlaganje otpada

Odlaganje otpada mora biti u skladu sa nacionalnim i lokalnim regulativama koje su na snazi. Svaka laboratorija je odgovorna za rukovanje i odlaganje otpada koji nastaje u toku rada.

### Upotrebljeni simboli

	Evropski znak usaglašenosti		Držati uspravno
	In vitro dijagnostičko medicinsko sredstvo		Kataloški broj
	Ne izlagati direktno sunčevim zracima		Lot broj
	Konsultovati uputstvo za upotrebu		Rok upotebe
	Ne koristiti više puta		Temperatura čuvanja
	Veličina pakovanja		Proizvođač
	Ovlašćeni predstavnik u Evropskoj uniji

## INSTRUCTION FOR USE

(EN)

### Sheep Blood Agar Plate

Medium is used for isolation and cultivation of fastidious pathogenic microorganisms like Neisseria, Streptococci etc.

#### Package contents:

Item code (packaging) REF	Description	Primary packaging code:	Number of products
PRM073V20	Substrate poured into petri dishes of Ø90	PRM073	20
PRM073V60			60
PRM073V240			240
PRM073M40			40

#### Directions

Surface spread the test inoculum aseptically on the plate. After incubation, observe growth and color of colonies.

#### Principle and interpretation

Sheep Blood Agar is a highly nutritious medium used for isolation and cultivation of fastidious microorganisms. Sheep Blood Agar is recommended by APHA (5) and Standard Methods (6, 7) for testing of food samples. Beef extract and tryptose provides carbon, nitrogen, amino acids and vitamins. Sodium chloride helps in maintaining the osmotic equilibrium of the medium. Presence of blood makes the medium more nutritious by providing additional growth factors required by fastidious organisms. It also helps in visualizing the haemolytic reactions. However, haemolytic reactions depend on the animal blood used. Sheep blood gives best results for Group A Streptococci (8), but sheep blood fails to support growth of Haemophilus haemolyticus since sheep blood is deficient in pyridine nucleotides..

#### Quality control

The data and results of quality control are given in the certificate of analysis for each lot.

#### Storage and shelf life

Storage between 2-8°C. Use before expiry date on the label.

#### Warning and precautions

In vitro diagnostic use only. Read the label before opening the container. Wear protective gloves/protective clothing/eye protection/ face protection. Follow good microbiological lab practices while handling specimens and culture. Standard precautions as per established guidelines should be followed while handling clinical specimens. Safety guidelines may be referred in individual safety data sheets.

#### Disposal

User must ensure safe disposal by autoclaving and/or incineration of used or unusable preparations of this product. Follow established laboratory procedures in disposing of infectious materials and material that comes into contact with clinical sample must be decontaminated and disposed of in accordance with current laboratory techniques.

#### Symbols used on labels

	European Conformity mark		This side up
	is an in vitro diagnostic medical device (IVD)		Catalogue number
	Do not expose directly to sunlight		Batch code
	Consult instructions for use		Use-by date
	Do not re-use		Temperature limit
	Pack size		Manufacturer
	European Authorized Representative (Authorised Representative)
